

GANESH KOLLURI

PRODUCT DESIGNER

USA | +1 (224) 388-0961 | gkolluri12@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Product Designer with 4+ years of experience designing enterprise SaaS and technical products for Microsoft, TikTok, and Adobe. Specialized in research-driven UX strategy, developer and technical user experiences, scalable design systems, and high-craft interface design. Experienced in exploring AI-powered product experiences, developer tools, and emerging large language model (LLM) capabilities, with hands-on familiarity with Xcode and AI-assisted development workflows. Delivered measurable outcomes including 35% faster task completion for Microsoft Teams, 22% increase in creator activation at TikTok, and 28% improvement in workflow efficiency at Adobe. Skilled at translating complex technical requirements and user needs into clear, accessible, and high-impact experiences across web and mobile platforms

CORE COMPETENCIES

Product Strategy: Problem Framing, Feature Definition, Success Metrics/KPIs, Data-Driven Decisions, Roadmap Prioritization, Impact Analysis

UX Research & Testing: User Interviews, Usability Testing, A/B Testing, Journey Mapping, Competitive Analysis, Behavioral Analytics, User Flows

Design Execution: Wireframing, Prototyping, Interaction Design, Information Architecture, Responsive Design, UX Writing/Microcopy

Design Systems & Scale: Component Libraries, Design Tokens, Pattern Documentation, Cross-Platform Design, Accessibility (WCAG 2.1 AA/AAA)

Tools & Collaboration: Figma (expert), Adobe XD, Miro, Dovetail, Google Analytics, Maze, Agile/Scrum, Cross-functional Stakeholder Management

PROFESSIONAL EXPERIENCE

ADOBE, USA | Product Designer

Jun 2025 – Present

- Redesigned Creative Cloud asset-sharing workflow for 2M+ users through 15 interviews and 50+ usability tests, achieving 28% faster task completion and 40% adoption increase within 3 months.
- Defined cross-product UX strategy for data visualization, designing unified component library with design tokens that reduced handoff time 40% and UI defects 50%.
- Spearheaded accessibility compliance across 5 product surfaces through WCAG 2.1 AA/AAA audits, resolving 30+ violations and achieving 100% compliance for shipped features.
- Implemented analytics framework using Google Analytics and Maze tracking 100K+ monthly sessions, executing A/B tests that increased user satisfaction from 3.8 to 4.2/5.
- Contributed 12 reusable components to Adobe Spectrum design system, improving consistency across 6 product teams and reducing engineering questions 35%.
- Orchestrated bi-weekly cross-functional design reviews with Product and Engineering, presenting research-backed rationale that reduced iteration cycles 30%.

TIKTOK, USA | Product Design Intern

Jul 2024 – May 2025

- Designed creator monetization features (tipping, subscriptions) with motion design, conducting usability testing with 40+ creators supporting 15K+ active creators within first quarter.
- Executed A/B testing strategy for creator onboarding across 3 flow variants, analyzing behavioral data from 50K+ users driving 22% increase in activation rate.
- Conducted competitive UX analysis across 5 platforms (YouTube Shorts, Instagram Reels, Snapchat), identifying 3 monetization gaps that influenced Q3 product roadmap.
- Audited 200+ design system components for WCAG 2.1 compliance, documenting pattern improvements that increased system adoption 25% across 4 teams.
- Partnered with Engineering on interaction specs and UX microcopy for 2 creator tools, delivering annotated documentation that reduced implementation questions 30% and bugs 40%.

MICROSOFT, India | UX Designer

Aug 2020 – Jul 2023

- Redesigned information architecture for Microsoft Teams file management used by 100M+ users, applying user research and interaction design to simplify complex technical workflows and achieving 35% faster task completion and 4.6/5 NPS.
- Transformed Azure Cost Management dashboard for 500K+ enterprise users, simplifying complex technical workflows through iterative prototyping and data-driven UX decisions, reducing time-to-insight 40% and improving CSAT to 4.3/5.
- Delivered UX design across the full product lifecycle for Azure Monitor and Security Center, creating scalable technical product patterns for complex cross-platform experiences while maintaining 4.2/5 satisfaction.
- Established a centralized UX research repository organizing 80+ interviews and 15 usability studies, creating a taxonomy for insights referenced in 90% of feature-definition sessions.

- Collaborated closely with Engineering and Accessibility teams to integrate WCAG 2.1 AA standards into technical product workflows, developing reusable audit checklists that reduced accessibility defects 50%.
- Explored emerging AI and developer-tool workflows, including LLM-assisted product experiences and Xcode-based development environments, to understand opportunities for improving technical user experiences.

EDUCATION

Master of Science in Information Systems | Saint Louis University, Missouri, USA

Aug 2023 – May 2025

Bachelor of Technology in Electrical & Electronics Engineering | SVEC University, India

Jun 2019 – Jul 2022
